

SLABARMOR[™]

Our products are specially formulated to clean and enhance polished concrete or power-floated concrete when combined with honing polishing pads. Regular use increases the abrasion resistance of any concrete floor.

The first products to effectively restore and maintain finished concrete — including polished concrete — without aggressive grinding or harsh chemicals.

Their pH neutral chemical composition removes dirt without leaving a residue, while a rinse free formula safely lifts dirt without dulling the brilliance of your concrete floors.

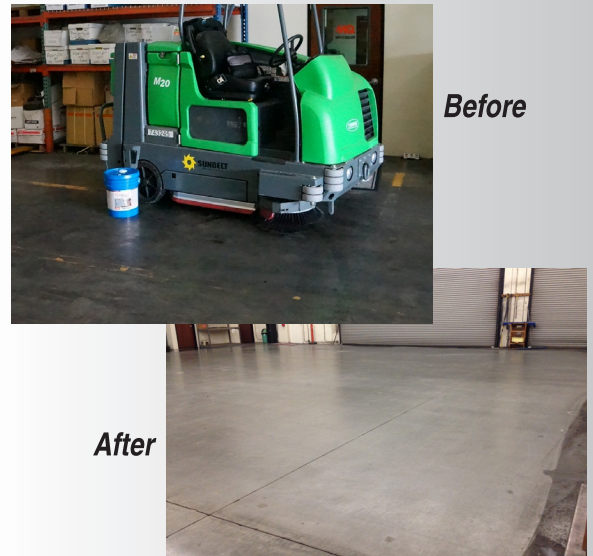

Regular use of SlabArmor Plus products cleans and hardens concrete, helps extend the life of polished concrete floors, and reduces maintenance costs.

This low VOC reactive, penetrating product forms an insoluble chemical bond with the concrete. The result is a dense, sealed surface with superior hardness, gloss and slip resistance.

Seal & Shine is a wear-resistant finish that improves the sheen, hardness and chemical resistance of SlabArmor and SlabArmor Plus floors.

Best results and coverage are obtained by cleaning the surface with SlabArmor Plus *Clean & Condition* prior to application.

Using SlabArmor with selected polishing pads will help you achieve superior results. We are confident you will be satisfied with the results. Call 800-421-1244 for an onsite demonstration.

The ultimate concrete floor cleaner and restorer.

The economical way to achieve high gloss and reflectivity.

MQ Whiteman SlabArmor™ Plus Condition & Restore reduces the amount of labor required to clean concrete surfaces, and helps extend the life of industrial floors.

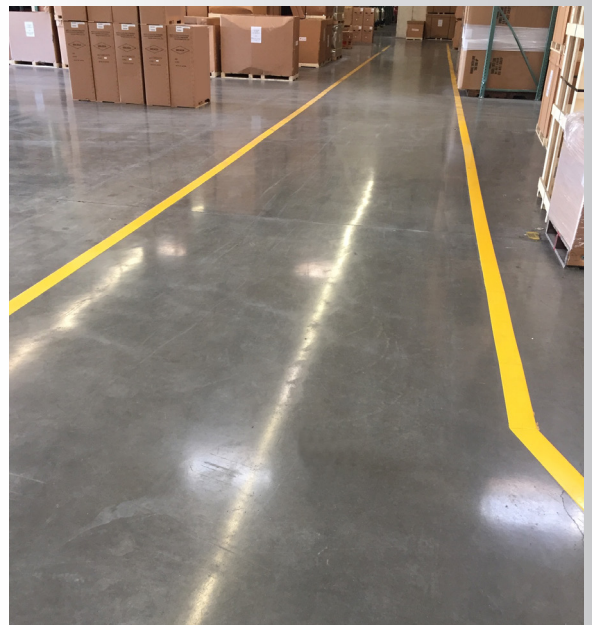

Formulated for use with standard power scrubber equipment, SlabArmor Plus products are the ultimate concrete floor cleaners and restorers.

- **Ideal for cleaning commercial, retail, industrial, and institutional concrete floors**, as well as terrazzo and vinyl surfaces.
- **Contains no harmful compounds** that will contaminate food, meat, or pharmaceutical handling and processing equipment or facilities.
- **Makes concrete floors less porous and easier to clean**, creating an environment less susceptible to the proliferation of harmful bacteria.
- **Cleans resilient and non-resilient floor surfaces**, quickly releasing oil and deposits.
- **Available in a variety of sizes** from 1 to 275 gallons.

EarthSmart[™]

MQ Whiteman Concrete Solutions are environmentally neutral compositions. Finish your job secure in the knowledge these products pose no risk to crew members or the environment. A benefit on jobs with LEED requirements.
